

BBQ - GAS GRILL

We want you to enjoy your Freshslice Take 'N' Bake pizza so please keep in mind that a barbecue is a very difficult thing to control heat-wise, so regular checking is essential to avoid burning.

1. Cook time: Approximately 5-8 mins. Baking times may vary, do not leave grill unattended.
2. Preheat grill to 375-400°F (190-200°C).
3. Remove all the packaging & place your pizza on heat-shielding surface such as preheated pizza stone or 3 layers of aluminum foil & place in the center of the grill. Close lid.
4. Rotate 180° half way through.
5. Check pizza often by lifting the crust with a spatula.
6. Remove pizza using oven mitts from the grill. Cut, serve and Enjoy.

CHARCOAL & WOOD PELLET GRILLS

The instruction of cook time & temp. are approximately the same, but varies from unit to unit & needs more checking.

We are crossing our fingers that you get it right and you will order & enjoy again.

See you soon 😊
